EIA INSIGHTS December 27, 2019

Natural Gas

Withdrawal Less than Expectations

The EIA reported a 58 Bcf storage withdrawal for the week ending December 27, 2019. The withdrawal was less than the average for this week of the year, 113 Bcf, and less than the average of expectations, 61 Bcf.

Storage at 3,192 Bcf is 487 Bcf above inventories for this time last year and 38 Bcf below the five-year average.

The EIA report was considered bullish to prices and prices did have a brief rally with the release of the report. However, prices then fell back as it appears storage and production are more than sufficient to meet the demand during this winter season.

To see what the FA platform can do for you [sign up](#) for a webinar and free trial on our website or contact one of our team members.

Benefits of FA:

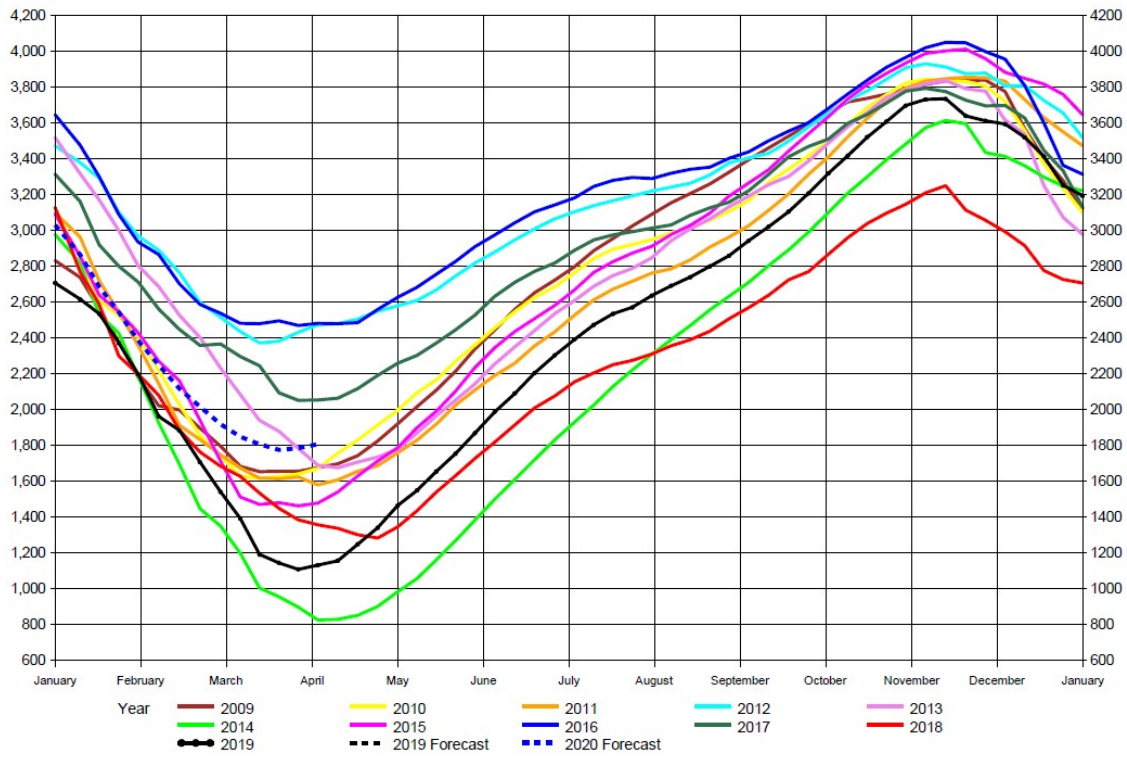

- Easy to use, web-based and menu driven platform.
- Extensive history of data.
- Superior graphing capabilities
- Competitively priced.
