

## Natural Gas

### Injection Less than Expectations

The EIA reported a 34 Bcf storage injection for the week ending November 1, 2019. The injection was among the lowest injections for this week of the year and less than the average of expectations, 43 Bcf.

Storage at 3,729 Bcf is 521 Bcf above inventories for this time last year and 29 Bcf above the five-year average.

Prices jumped with the release of the report but then fell, ending the day down about 4.5 cents. With storage now at a relatively high level for the end of the injection season and production strong, higher prices will be dependent on sustained below average temperatures.

To see what the FA platform can do for you [sign up](#) for a webinar and free trial on our website or contact one of our team members.

#### Benefits of FA:

- Easy to use, web-based and menu driven platform.
- Extensive history of data.
- Superior graphing capabilities
- Competitively priced.
