

Weekly Natural Gas Storage Report

for the week ending August 20, 2021 | Release Date: August 26, 2021

29 Bcf Natural Gas Storage Injection Much Below Expectations

The EIA reported a 29 Bcf injection for the week ending August 20, much below the average of expectations of 38 Bcf., causing the market to jump and ending the day up near 30 cents.

NYMEX Front-Month Natural Gas Contract (\$/MMBtu)

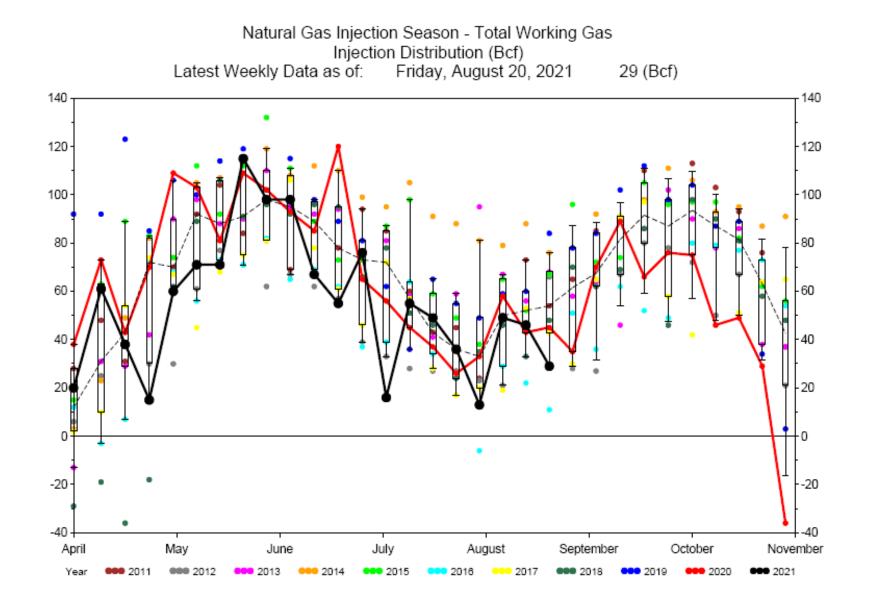

The low injection was attributed to the combination of hot weather and a substantial decline in wind generation. Traders are now concerned that storage levels will not sufficient should there be a cold winter.

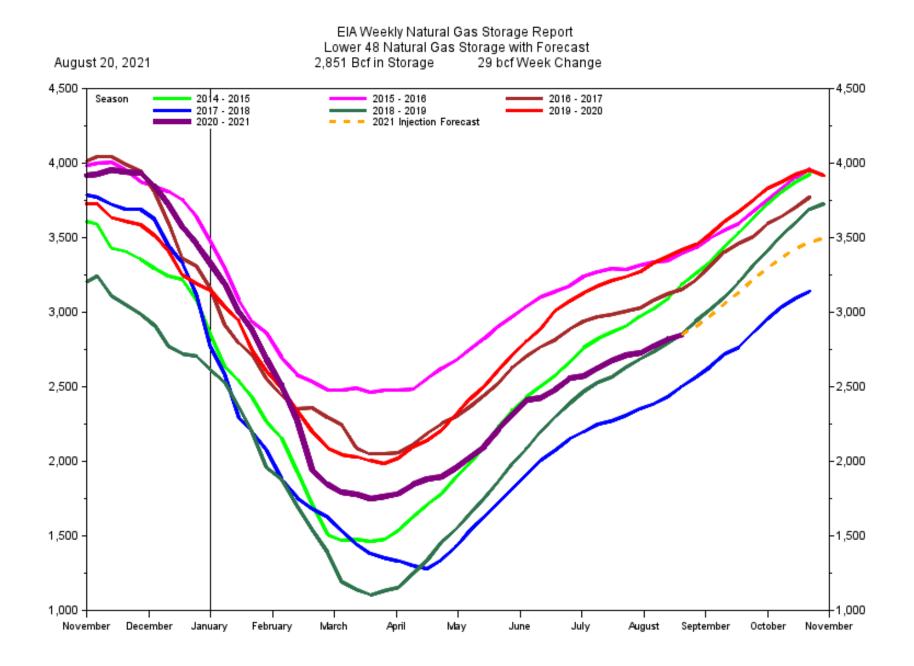

EIA Weekly Natural Gas Storage Data Report August 20, 2021

	Bcf in Storage	Week Change	Last Week Storage	Week Change	Last Year Storage
East Region	661	16	645	16	775
