

20 Bcf Natural Gas Storage Injection Again, Much Below Expectations

The EIA reported an injection of 20 Bcf natural gas into storage for the week ended Aug. 27 (The lowest injection in the last ten years: See the first chart below). The average of expectations was 25 Bcf so the bullish report sent prices higher.

The October contract had already increased by 31 cents during the two previous trading days due to production disruption caused by Hurricane Ida and concerns about well below average natural gas storage levels for the coming winter heating season.

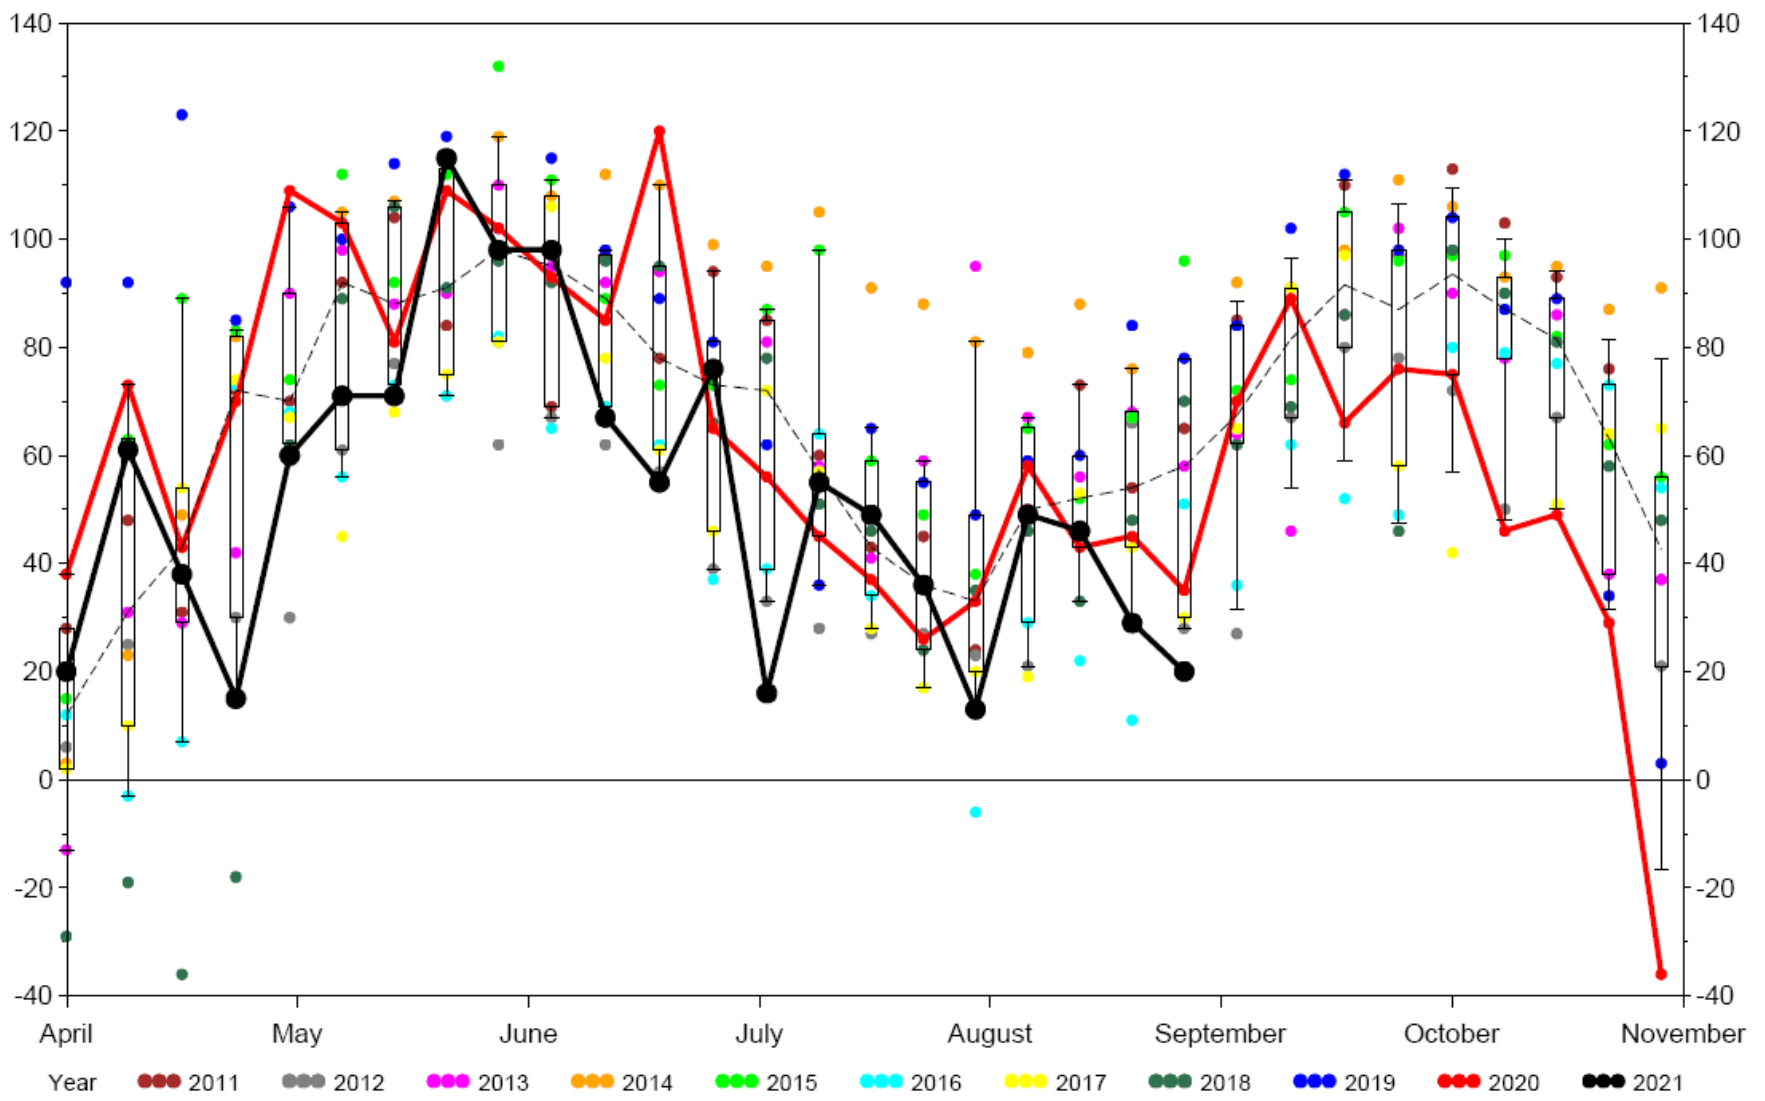

EIA Weekly Natural Gas Storage Data Report August 27, 2021

	Bcf in Storage	Week Change	Last Week Storage	Week Change	Last Year Storage
