

## 7 Bcf Natural Gas Storage Injection Close to Expectations

The EIA reported a 7 Bcf injection into natural gas storage for the week ending November 5, price sold-off in response to the new storage data. Prices were already trading lower due to the lack cold weather across the country. Also pressuring prices was the generally held belief that there will be one more injection for the winter withdrawal season begins. Storage at 3,618 Bcf is now 309 Bcf below last year at this time and 127 Bcf below the 5-year average.
