

81 Bcf Natural Gas Storage Injection Much Less than Expectations

The EIA reported an 81 Bcf injection of natural gas into storage for the week ending October 8, much to the surprise of traders whose expectations average was 92 Bcf. 81 Bcf was less than all estimates made before the number was released. Natural gas futures prices, already more than 20 cents higher for the day, spiked on the release of the report. Analysts suggested that that seasonal outages, strong power burns, and wind generation contributed to the low storage injection.

EIA Weekly Natural Gas Storage Data Report October 8, 2021

	Bcf in Storage	Week Change	Last Week Storage	Week Change	Last Year Storage
East Region	834	24	810	31	908
