**The CFTC Commitment of Traders Report as of Tuesday, September 20, 2022 shows the Non-Commercials Net Long Positions in WTI Crude Oil increased during the week by 10,896 contracts to 287,520 contracts. 5,408 long positions were added and 5,488 Short positions were covered.**

**Despite two consecutive weeks of increased net long positions, the Funds remain at lowest levels of net long positions (See page 6). Since July 2020 the long positions of the Funds has dropped from over 700,000 long positions to about 360,000 positions (See page 7).**

**Given the unprecedented volatility of the crude oil market it is understandable that the Funds are not willing to participate in the crude market to the degree as in the past.**
